TOASTING

Also available in MT and MT+ toasts.

Quartz™ Toast Based on the alchemy of water, the Quartz™ toast is ideal for delicate wines whose fruit needs protecting to obtain roundness, while respecting the expression of the grape's minerality. A perfect match for white wine varietals.

Rubis™ Toast This toast uses a slow, deep and long heat (almost twice as long as a traditional toast). This process affects the oak tannins in a way that allows for a long aging period, revealing the intense and concentrated expression of your wine.

Basalte™ Toast Closed, this toast reinforces the empyreumatic nuances which are typical of the traditional Burgundy toast.

FIRST FRENCH COOPERAGE *of* AMERICA

This year marks the 40th Anniversary of the founding of Tonnellerie Francaise in Calistoga, California. Since 1980, we have forged relationships, gained experience, and partnered with countless wine-makers around the globe. As the 5th generation of Nadalié's, we continue to innovate and look to the future, while always mindful of how we got here. We are ever grateful to the generations that came before us, and all that have supported us over the years; from family and friends, to dedicated staff and loyal partners throughout the industry, we thank you.

Sincerely,
Vincent Nadalié

OUR MILL *in* PENNSYLVANIA

For generations the Nadalié family has put great importance on controlling the manufacturing process from tree selection to the finished product. Acquired in 2003, our Western Pennsylvania mill combines state of the art technology with the finest selection of White oak (*Quercus alba*) to create barrels of exceptional quality and beauty.

Nadalié is a proud supporter of the White Oak Initiative and other conservation projects through the American Forest Foundation. To learn more, visit: forestfoundation.org
